

»Supply and installation of e-charging stations and equipment«
joint public procurement of the companies of HSE group

**Summary of technical specifications or
the technical part of the public procurement documentation relating to the award of the contract**

Four (4) companies of the HSE group/Contracting Authorities are included in the joint public procurement, which will carry out the joint public procurement procedure according to the rules of occasional joint public procurement:

- Holding Slovenske elektrarne d.o.o. (hereinafter referred to as »HSE«),
- Dravske elektrarne Maribor d.o.o.,
- Soške elektrarne Nova Gorica d.o.o.,
- HSE - Energetska družba Trbovlje d.o.o.

The subject of the joint public procurement titled »Supply and installation of e-charging stations and equipment« is the implementation of charging infrastructure, which primarily includes electrical design, obtaining approvals and permits, supply and installation of equipment, installation of the necessary materials, and execution of construction works (hereinafter referred to as »the goods«), as further defined in the technical specifications – the technical part of the public procurement documentation relating to the award of the contract.

The Contracting Authority intends to:

- obtain Tenders on the basis of which it will conclude a framework agreement for a period of twenty-eight (28) months or until the maximum estimated contractual value under the framework agreement has been reached, with the reservation of the right, i.e. the possibility to extend the validity period of the framework agreement in the event that the maximum estimated value is not reached within twenty-eight (28) months, with up to five (5) Tenderers whose tenders are admissible and, according to the award criterion, the most advantageous;
- select, from among the Tenderers with whom the framework agreement is concluded, the Tenderer for the supply of goods for the first individual contract based on the value from the open procedure.

The Contracting Authority for the first individual contract is HSE. The subject of the first individual contract is the upgrade of the existing charging infrastructure of the Contracting Authority HSE for the purpose of increasing the connection capacity, the supply of a battery storage system, and the supply of additional charging stations at the location/headquarters of the Contracting Authority HSE, i.e. Koprška ulica 92, 1000 Ljubljana. The first individual contract will be implemented on a "turnkey" basis.

The Contracting Authority will, for the subject of the first individual contract of the Contracting Authority HSE, organize a site visit at Koprška ulica 92, 1000 Ljubljana, including an inspection of all existing systems at the location related to the implementation of the subject of the first individual contract.

A site visit by Tenderers is mandatory and constitutes a prerequisite for the submission of their tender, as it allows Tenderers to become fully acquainted with the site and all existing systems at the location that are relevant to the implementation of the subject of the first individual contract. Therefore, prior to submitting their tender, Tenderers must carry out the site visit. The rules governing the organization and conduct of the site visit are set out in the technical specifications - technical part of the public procurement documentation relating to the award of the contract.

In case of potential differences between Slovenian text in the public procurement documentation relating to the award of the contract and this summary in English translation, the Slovenian version takes precedence.
