

Public tender EdT-001/2026
»Overhaul and refurbishment of Gas Turbine Units Pb1 and Pb2«

Summary of technical specifications

The subject of this public tender, carried out as an open procedure in accordance with Article 40 of the Slovenian public procurement act (ZJN-3), titled "Overhaul and refurbishment of Gas Turbine Units Pb1 and Pb2" is divided into three individual lots:

- **Lot 1:** Replacement of stacks, reconstruction of flue gas ducts of the gas turbine units, and refurbishment of inlet air filters and air-to-air coolers.
- **Lot 2:** Upgrade of the control and regulation system on both gas turbine units.
- **Lot 3:** Inspection and overhaul of technological equipment on the turbine, generator and auxiliary systems of the gas turbine units.

Completion period (applies to all three lots, identical):

The public contracts shall be performed within a total period of 240 days from the date of contract signature for an individual lot with the selected contractor, in accordance with the procurement documentation. This period is divided into two consecutive phases:

- **Phase 1:** All works on Gas Turbine Unit Pb1 shall be completed within 120 days from the date of contract signature. This phase includes commissioning trials and testing of the newly installed control system and the refurbished equipment.
- **Phase 2:** Within the subsequent 120 day period, following the completion of Phase 1, the same scope of works shall be carried out on Gas Turbine Unit Pb2.

The detailed implementation schedule shall be agreed between the contracting authority and the selected contractor.

Each lot shall constitute a separate and independent subject of the public contract.

The estimated value of the public contract by lot is as follows:

- **Lot 1: 1.400.000,00 EUR without VAT**
- **Lot 2: 500.000,00 EUR without VAT**
- **Lot 3: 300.000,00 EUR without VAT**

The Contracting Authority shall organise separate site visits for each lot of the public contract, involving an inspection of Gas Turbine Units PB1 and PB2 at the site located at Ob železnici 27, 1420 Trbovlje.

A site visit by Tenderers is mandatory and constitutes a prerequisite for the submission of their tender, as it allows Tenderers to become fully acquainted with the site and all existing systems at the location that are relevant to the implementation of the subject of the public contract. Therefore, prior to submitting their tender, Tenderers must carry out the site visit. The rules governing the organization and conduct of the site visit are set out in the technical specifications - technical part of the public procurement documentation relating to the award of the contract. The individual contracts will be implemented on a "turnkey" basis.

In case of potential differences between Slovenian text in the public procurement documentation relating to the award of the contract and this summary in English translation, the Slovenian version takes precedence.
