

Brush holder constant pressure drawing ZCM4011-1 / SKA6999-3

Specific brush holder engineered in materials and technical design characteristics with the aim of making ASTOM traction Motor type TT668A2 maintenance more efficient and obtaining greater wear performance of brushes and collectors (results verified with supplies, made).

The DM07684 brush holder has been specifically designed to achieve the maximum possible performance with specifically designed brushes code DM32065 in original grade Morgan EG720.
