

SUMMARY OF TECHNICAL SPECIFICATIONS OR THE TECHNICAL PART OF THE PUBLIC PROCUREMENT DOCUMENTATION RELATING TO THE AWARD OF THE CONTRACT

»Construction of the Zagorje ob Savi Solar Power Plant with a Battery Energy Storage System«

The subject matter of the public contract is the design, supply, installation or erection, testing and commissioning of the Zagorje ob Savi solar power plant with an installed capacity of 1.38 MWp and the associated battery energy storage system (BESS) with a power rating of 1.25 MW and a capacity of 5 MWh, including all equipment required for its operation and control and connection to the HSE control centre. The project will be implemented at the closed Kamnolom Zagorje municipal waste landfill site in the Municipality of Zagorje ob Savi.

The contract includes, among other things, photovoltaic modules, inverters, a supporting structure with prefabricated reinforced-concrete foundations, cable connections, earthing and lightning protection, the BESS, a transformer substation with a 1.6 MVA transformer, and the required medium-voltage (MV) and low-voltage (LV) equipment. It also includes construction works, drainage and the planned landfill remediation measures, the construction of maintenance access roads and fencing, connection to the MV distribution network, and the installation of telecommunications links in accordance with the grid connection approval.

The successful contractor shall prepare all required documentation, including the design documentation for execution of the works, as-built documentation, proof of the reliability of the structure, and operation and maintenance manuals. It shall carry out the required tests, measurements, commissioning and personnel training, as well as all activities within its contractual scope required for the successful completion of the technical inspection and for obtaining of the use permit.

The contract shall be carried out on a turnkey basis under the FIDIC Conditions of Contract for Plant and Design-Build, First Edition 1999 (the Yellow Book) (hereinafter referred to as the contract documentation).

The Contracting Authority intends for the public contract in question to be co-financed by the European Union from the Just Transition Fund (JTF) under the European Cohesion Policy Programme 2021–2027 in Slovenia.

A more detailed specification of the contract is set out in the technical specifications – the technical part of the public procurement documentation relating to the award of the contract, which, together with the tender specification and the contract documentation, forms part of the restricted part of the public procurement documentation relating to the award of the contract. Access to the restricted documentation will be granted only to prospective tenderers who submit evidence of a reference project meeting the reference requirements specified in the publicly available procurement documentation.

Obtaining the restricted part of the public procurement documentation relating to the award of the contract is a prerequisite for the submission of a tender.

The Contracting Authority shall also organise a mandatory site visit in respect of the subject matter of the contract. The Contracting Authority shall organise the site visit separately for each tenderer to whom The Contracting Authority has provided the restricted part of the public procurement documentation relating to the award of the contract.

Participation in the site visit is mandatory for tenderers wishing to submit a tender.

In case of potential differences between Slovenian text in the public procurement documentation relating to the award of the contract and this summary in English translation, the Slovenian version takes precedence.
