SUMMARY OF TECHNICAL SPECIFICATIONS OR THE TECHNICAL PART OF THE PUBLIC PROCUREMENT DOCUMENTATION RELATING TO THE AWARD OF THE CONTRACT

» Supply, installation and commissioning of the medium-voltage cable line, including distribution substations RP1 and RP2«

The subject matter of the public procurement contract is the supply, installation and commissioning of the medium-voltage cable line, including distribution substations RP1 and RP2. The contract covers the preparation and submission of all required documentation (Building Compliance Dossier) and includes all activities necessary for the successful obtaining of the occupancy permit.

The contract shall be performed in accordance with the FIDIC Conditions of Contract for Construction (Red Book), 2017 Edition.

A more detailed specification of the contract is set out in the technical specifications – the technical part of the public procurement documentation relating to the award of the contract, which, together with the tender specification and the contract documentation, forms part of the restricted part of the public procurement documentation relating to the award of the contract.

Obtaining the restricted part of the public procurement documentation relating to the award of the contract is a prerequisite for the submission of a tender.

The Contracting Authority shall also organise a mandatory site visit in respect of the subject matter of the contract. The Contracting Authority shall organise the site visit separately for each tenderer to whom The Contracting Authority has provided the restricted part of the public procurement documentation relating to the award of the contract.

Participation in the site visit is mandatory for tenderers wishing to submit a tender.

In case of potential differences between Slovenian text in the public procurement documentation relating to the award of the contract and this summary in English translation, the Slovenian version takes precedence.
